11 January 1989

Mr. William Burrows
709 Division Street
Gloucester City, New Jersey 08030

My dear Mr. Burrows:

We are very glad to receive, and verify, your reception report of 26 August 1988. During daylight hours WKDW operates with a power of 2500 watts into a non-directional antenna. We operate full time with a pre-sunrise power of 250 watts and a night power of 127.8 watts.

Our main transmitter is a completly solid-state Harris SX-2.5 equipped with the Kahn independent sideband AM streo system.

I am enclosing a sales "rate Card" with a WKDW coverage map on it. Thanks for the report!

Very truly yours,

Lee S. Parr
Engineering manager
